Infection Prevention and Control (IPC)

Intercare has policies and processes in place to help reduce the risk of infectious diseases, such as influenza, from coming into and spreading through our facilities. These safeguards are referred to as “Infection Prevention and Control.”

Influenza vaccination programs for staff and Residents, hand hygiene and respiratory etiquette are important steps that we follow to help reduce the risk of infections in our facilities.

Given that the best line of defense against infection is **hand-washing**, please remember to wash your hands often and thoroughly. Hand cleaning gel is available at the main entrance of each facility.

Family members, friends and visitors can help us keep our Residents safe!

Here’s what you can do to help:

- ♥ Do not visit your family member or friend if you are sick or feel like you are getting sick;
- ♥ Wash your hands before and after you leave the Kingsland Terrace;
- ♥ Use alcohol hand gels in between hand washing;
- ♥ Cough or sneeze into your sleeve to avoid spreading germs;
- ♥ Don’t bring small children to visit if they are ill or have been exposed to influenza at school or in the community;
- ♥ Urge your family member or friend to tell a Nurse if he/she has any signs of influenza; and
- ♥ Urge your family member or friend to avoid close contact with others during the influenza season or outbreaks.

The 'Four (4) Moments of Hand Hygiene'

Intercare follows the '**Four 4 Moments**' of hand hygiene, as outlined by AHS, to reduce the risk of spreading potential sources of infection within our facilities.

The **Four (4) Moments** of hand hygiene are as follows:

- ♥ **Moment 1:** Before contact with a resident or resident’s environment, includes but is not limited to: putting on personal protective equipment; entering a resident’s room; and before providing resident care.
- ♥ **Moment 2:** Before a clean or aseptic procedure includes but is not limited to: wound care; handling intravenous devices; handling food; or preparing medications.
- ♥ **Moment 3:** After exposure (or risk of exposure) to blood and/or body fluids, includes but is not limited to: when hands are visibly soiled and following removal of gloves.
- ♥ **Moment 4:** After contact with a resident or resident’s environment, includes but is not limited to: i) removing personal protective equipment; ii) leaving the resident environment; and iii) following the handling resident care equipment.

Outbreak Management

In the case of an "outbreak" (i.e. numerous cases of a gastro-intestinal (GI) or respiratory illness), signage advising of the outbreak will be posted at the facility.

PLEASE NOTE: These types of infections can easily spread. To decrease risk to Residents, families, visitors and staff, activities at the facility may be cancelled and visiting may be limited or restricted during an outbreak.

Resident Safety

Intercare is committed to promoting and maintaining a culture of safety for our Residents, families, visitors /guests, staff and volunteers. It is the responsibility of all staff and volunteers to contribute to the health and safety of our work environment and the well-being of our Residents.

Residents and family members also play a very important role in promoting safety. As such, Intercare encourages you to report any safety concerns that you may have while in our facilities to our staff or by completing and submitting a **Feedback Form** to us.

In Case of Emergency

There are various types of **emergencies** that may arise within our facilities. Our first priority in the face of an emergency is the safety and well-being of our Residents. Particular actions taken by staff will depend on the type of emergency.
